

# EDUARDO JAVIER THOMSON

Junior Full Stack Developer | Founder of Nowagon Software

Ezeiza, Buenos Aires, Argentina · +54 11 3188 3446 · javierthomson1986@gmail.com

---

## PROFESSIONAL PROFILE

Junior Full Stack Developer with 15+ years of experience in IT infrastructure, networking, and databases, now applied to software development. Founder of **Nowagon Software**, an independent custom-development venture where I designed, built, and shipped three complete full-stack systems — with online payments, authentication, security, and self-managed infrastructure — for real businesses, not tutorial exercises. I combine a solid foundation in SQL Server, Windows/Linux systems, and corporate networking with a modern stack (React, Node.js, Firebase) and an AI-augmented workflow (Claude Code) that speeds up development without cutting corners on quality or security practices.

---

## TECHNICAL SKILLS

|                |                                                                                                                                                              |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend       | HTML5, CSS3 (Flexbox / Grid), JavaScript (ES6+), React (Vite), PWA                                                                                           |
| Backend        | Node.js / Express, C# / .NET, Python, PHP, REST APIs                                                                                                         |
| Databases      | SQL Server, SQLite (better-sqlite3, WAL), Firebase (Firestore / Realtime DB), Oracle PL/SQL                                                                  |
| Payments       | Mercado Pago (Checkout Pro, signature-verified webhooks)                                                                                                     |
| DevOps / Infra | Docker & Docker Compose, Cloudflare Tunnel, PM2, Linux (Ubuntu Server), Windows Server, Active Directory, VMware / Hyper-V, LAN/WAN networking, VPN, backups |
| Security       | Helmet.js, rate limiting, environment-based credential management (.env), token-based authentication                                                         |
| Tools          | Git / GitHub, VS Code, Claude Code (AI-assisted development)                                                                                                 |

---

## NOWAGON SOFTWARE — PRODUCTION PROJECTS

### Founder & Full Stack Developer

*Custom-built, end-to-end web systems: frontend, backend, database, payments, and infrastructure.*

#### Eterno Instante — Online beach photo sales platform *(React/Vite · Node.js/Express · SQLite · Python/Pillow · Docker)*

- Full-stack platform in production for a tourist photography business: photographers upload photos and tourists search for and purchase theirs online.
- Mercado Pago (Checkout Pro) payment integration with signature-verified webhooks.
- Node/Express backend hardened with Helmet; Python (Pillow) worker for image processing, watermarking, and thumbnails.
- Self-managed infrastructure: Docker Compose containers on a dedicated Linux server, exposed via Cloudflare Tunnel.
- Defined its own business model: system licensing to other photographers with a monthly maintenance plan.

#### Cuaderno Digital (Kiosco Ali) — Store-credit management system for neighborhood shops *(React · Node.js/Express · SQLite · PWA)*

- Replaces a paper store-credit notebook for a neighborhood kiosk: client, debt, and payment management with FIFO logic and debt-aging alerts.
- Shareable PDF reports via WhatsApp, automated daily backups, and an installable app (PWA).
- Token-based authentication, rate limiting, and security hardening for public internet exposure.
- Deployed to production with Cloudflare Tunnel and PM2; drafted a commercial proposal to offer the system to other shops.

**Teenage Kicks — Online clothing store** *(React/Vite · Node.js/Express · Firebase · Mercado Pago)*

- Complete e-commerce build with authentication (Firebase Auth), a real-time database, and shopping cart.
- Security audit and fixes: removed hardcoded credentials, introduced environment variables, secured admin routes.
- Full UI redesign with a custom visual identity.

**IT INFRASTRUCTURE EXPERIENCE**

---

**IT Systems Administrator** | Aeropuertos Argentina, Ezeiza October 2022 – October 2025

- Administration and support of critical infrastructure for airport operations.
- Incident resolution, technology platform maintenance, and vendor coordination.
- Worked with SQL Server and high-availability environments.

**Network & Terminal Administrator** | DotCom, Canning August 2019 – December 2021

- Led IT infrastructure migrations and implementations for corporate clients.
- Implemented Active Directory, DNS, DHCP, file servers, and networking solutions.
- Configured VPNs, backup systems, and IP surveillance platforms.

**Specialist Technician** | QosIT, Villa La Angostura – Neuquén April 2019 – August 2019

- Administration of wired and wireless networks, and support for servers and workstations.

**Programmer** | Indra, CABA March 2014 – July 2014

- Developed and maintained Oracle PL/SQL procedures, scripts, and optimizations for Telefónica projects.

**Specialist Technician** | Insystems / All-kom, CABA November 2007 – December 2012

- Administered Windows Server, Exchange, DHCP, and IIS environments on IBM and HP platforms.
- Deployed networking, SQL Server, and critical infrastructure monitoring.

**EDUCATION**

---

**2024** Web Programming (HTML, CSS & JavaScript) – CodeaRock

**2008** Systems Engineering – UAI (incomplete, 24 courses passed)

**2003** IT Technician – E.E.S.T. N°5 John F. Kennedy (graduated)

**LANGUAGES & OTHER**

---

**Spanish:** Native    **Technical English:** Reads documentation and code fluently    **Availability:** Immediate    **Work mode:** On-site / Hybrid / Remote
